SKILLS
JavaScript, React, Redux, HTML5, CSS3, Sequelize, Git

PROJECTS

CookUp | *(React/Redux, HTML5, CSS3, Sequelize, Express, JavaScript, Google Maps)*   **live** | **github**
- Designed the overall structure, UI / UX of the project to allow a responsive and intuitive feel with HTML and CSS.
- Leveraged relationships, joins table, eager loading, and Sequelize models to design and implement the database for core features like the ability to create events and groups.
- Crafted all of the CRUD API required to query, transport, mutate, and update data with proper authorization & validation middlewares to ensure protection.
- Modeled a mobile friendly version of the app with pure vanilla CSS.
- Integrated front-end components with Redux/Thunk to streamline data & maintain state for components

Mybnb | *(React/Redux, HTML5, CSS3, Sequelize, Express, JavaScript, Google Maps)*   **live** | **github**
- Implemented and designed an intuitive UI with React for creating listings and bookings using a step by step process with modals as well as form validation on both the client and server side to ensure proper data communication.
- Managed scheduling and booking CRUD through custom transactional database operations using Express Validator and Sequelize.
- Crafted components like modals, dropdowns, forms, etc. from scratch with pure CSS
